EXPERIENCE

Bizchat: An AI-Powered Tool for Business Plan Writing

Baltimore, United States

Graduate Research Assistant

August 2025 – Present

- Developed research questions and designed workshop activities regarding collective evaluation of AI-generated business plans
- Maintain existing code bases using React.js and Typescript.
- Working with Baltimore Community Lending to develop features that help entrepreneurs evaluate AI generated business plans.
- Designed pre- and post- survey and co-hosted two workshops in low-income community in Annapolis and two workshops at UMBC to deploy BizChat.

Space for All - Building Accessible Makerspaces with and for Youth and Young Adults with Autism in Baltimore City

Baltimore, United States

Graduate Research Assistant

January 2026 – June 2026

- Attended Black SONs and Rec-to-Tech event in Baltimore area to build relationship with local organizations; Learned how 3D printing objects worked in accessibility context
- Analyzed focus group and panel discussion transcripts and coded themes;
- Wrote reflection report regarding research methods;

Internship

Hikvision

Hangzhou, China

Front-end Developer

April 2022 - August 2022

- Completed 30+ tasks and fixed 60+ bugs; worked with a UX designer to implement the new design prototypes of different test platforms; implemented front-end pages with interactable components using HTML, JavaScript and CSS.
- Developed new features for an inner UI automation test platform, including one that allowed test developers to create test scripts based on their mouse actions; reduced time for test developers to write test cases by 20%, which was praised by my mentor and test developers.
